SPA SYSTEM EASY LINE EFFECTIVE AND ECONOMICAL

PROVEN FUNCTIONALITY

Many renowned paint and lacquer manufacturers rely on HSM's top quality painting & lacquering systems. We are also proud of the positive user feedback we receive about the quality and functionality of our products.

6 BENEFITS YOU CAN'T DO WITHOUT

1. ... Easy insertion of the strainer with insertion aid (available in 105 µm, 125 µm and 195 µm)
2. ... Fast fitting of the cup to the adaptor connection
3. ... Integral ml and oz scales
4. ... Extra stability thanks to rim around the edge of the cup
5. ... Two recesses in the cup rim facilitate opening
6. ... Integral flip-top connection in the lid

IMPORTANT TO KNOW

Our two systems, **SPA easy line** and **SPA easy line mix**, are perfect in combination with all paint and lacquer applications:

SPA easy line

Larger quantities of paint or lacquer can be replenished quickly and cleanly.

SPA easy line mix

Smaller quantities of paint or lacquer are mixed directly in the cup.

Adapter

Assures quick changeover between the two systems.
(Adapters are available for all the most common cup spray guns)

The SPA system easy line requires an adaptor between the cup and spray gun.
